Prescription Drug Program Centenary University

The Prescription Drug Program covers FDA approved legend drugs. A prescription order from a physician is required for drugs to be eligible. Prescriptions may be refilled within one year of the original prescription date, when authorized by the physician and permitted by law. Any limitations that apply to an original prescription also apply to the refills.

The Horizon Prescription Formulary is a list of prescription medications developed by an independent Pharmacy and Therapeutics (P&T) Committee comprised of practicing physicians and pharmacists in New Jersey. The Horizon P&T Committee determines which drugs will be placed into preferred and non-preferred status within our open formulary. The priority consideration is clinical efficacy and safety, followed by other considerations such as second line therapies, and availability of commonly used and safe generics. At least two drugs from each therapeutic class are placed in the preferred status on the formulary. Once a quality review has determined that two or more drugs are equal to other therapeutic alternatives, the P&T Committee may place the most cost effective drug(s) into preferred status.
