Masters of Science in
COMPUTER SCIENCE

Centenary University's School of Business, Media & Writing presents the Master of Science (MS) in Computer Science, designed for individuals eager to advance their careers in the ever-evolving field of technology. Our program equips students with the essential skills needed to excel in areas such as Artificial Intelligence, Machine Learning, Data Science, Cybersecurity, Software Development, and more. Prepare to become a leader in the technological world with hands-on experience, cutting-edge coursework, and expert faculty guidance.

You will be ready for a career by participating in internships in any industry. Internships are matched to students' interests and often result in employment opportunities.

Program Objectives:

Deepen Technical Expertise: Master advanced concepts AI, machine learning, data science, and more.

Prepare for Industry Certifications: Gain skills for certifications like Certified AI Specialist and Data Scientist

Hands-On Learning: Engage in practical projects using state-of-the-art tools and labs.

Develop Problem-Solving Skills: Enhance your ability to tackle complex technological challenges.

Boost Career Prospects: Prepare for leadership roles across diverse industries.

Focus on Innovation: Stay ahead with cutting-edge curriculum designed for the future of tech.

Grow Through Internships: Access valuable industry experience and networking opportunities.

Foster Continuous Learning: Equip yourself for ongoing professional development in tech.
